ABOUT US

Garden architecture created with passion.

Gutroof is a brand that redefines outdoor spaces. We combine elegance with innovation, creating pergolas and awnings that harmoniously complement architectural projects. For years, we have been setting new standards in the industry, continuously improving our products to make them even more beautiful, durable, and functional.

Excellence is our philosophy. We focus on exceptional craftsmanship, attention to detail, and technologies that transform terraces and gardens into places of unmatched comfort and tranquility. With us, outdoor spaces become true oases of relaxation and luxury.

With Gutroof, you create spaces that increase the value of every investment. Our solutions guarantee quality, aesthetics, and functionality appreciated by the most demanding business partners.

Gutroof
A brand chosen by those who value quality, originality, and style at the highest level.

PERGOLAS

To meet the diverse needs of individual and business clients, we offer thoughtfully designed series of pergolas that combine versatility, functionality, and aesthetics.

Each line has been created with specific requirements of outdoor spaces in mind – from maximum shading, through integrated lighting, to emphasizing the architectural character of the surroundings.

We combine the classic advantages of pergolas with modern solutions – automatic opening and closing systems as well as intelligent controls, which truly enhance the comfort of use.
Our goal is to create products that not only meet but consistently exceed expectations in terms of workmanship quality, functionality, and timeless design.

PRIMARY

The PRIMARY model is a solid solution for spaces where durability, functionality, and control over terrace conditions are key.

The manually operated roof with adjustable blinds allows you to precisely regulate the amount of light and shade throughout the day. The steel structure with an anti-corrosion coating ensures weather resistance, and the integrated drainage system enhances comfort during rain. Various size options make it easy to adapt the pergola to the space – from smaller terraces to larger relaxation areas. The cohesive, anthracite color scheme emphasizes the modern character of the structure. PRIMARY is a solution for those who expect a stable structure, an adjustable roof, and reliability in everyday use.

PREMIUM

This is a modern pergola available in both wall-mounted and freestanding versions, designed with durability and convenience in mind.

It is the choice for investors who expect more – larger profiles, greater resistance, and higher stability. Thick aluminum profiles, steel louvers, and an integrated water drainage system make this series ideal for more demanding weather conditions. Designed for intensive use, with no compromises in assembly or aesthetics.

SUMMIT

SUMMIT is a pergola designed for spaces where not only functionality matters, but also the impression created by its form.

The precisely engineered roof with louvres adjustable up to 135° allows for seamless control of light and shade, creating conditions that adapt to the rhythm of the day. The aluminum structure, coated with Akzo Nobel paint, ensures durability and resistance, maintaining a flawless appearance for years to come.

Integrated water drainage and invisible mounting elements emphasize the clean lines of the structure and attention to detail. Intertek and TÜV certifications confirm the highest standard of workmanship.

ELEGANCE

The ELEGANCE terrace pergola is a solid solution for projects requiring both durability and aesthetics.

Elegance is a series in which form goes hand in hand with function. Slim proportions, four refined color variants, and high manufacturing precision make this pergola a cohesive element of modern architecture. Thanks to the option of wall-mounted or freestanding installation, as well as manually adjustable louvers, investors gain design flexibility without sacrificing aesthetics.

ELEGANCE DUO

The ELEGANCE DUO garden pergola combines classic functionality with modern precision in light control.

It features a divided roof with independently adjustable louver panels. This solution allows precise management of light and airflow – ideal for spaces where the sun shines unevenly. Perfect for both private gardens and commercial relaxation zones.

ELEGANCE AUTOMATIC + LED

Automatic roof adjustment controlled by remote and subtle LED lighting create a pergola that meets user needs from dawn to dusk.

A stable structure and the option of freestanding or wall-mounted installation make it a universal solution for gardens, terraces, and hotel spaces. Aesthetics, convenience, and light – all in one form.

DELUXE

The Deluxe series is synonymous with elegance and modernity in the world of terrace roofing.

Pergolas from this line impress with a minimalist form that harmoniously fits any space. Subtle finishes and carefully chosen proportions give them a prestigious character. The louvered roof, integrated into the whole structure, adds lightness and allows seamless blending of light and shade.

REFERENCE

Designed for the most demanding projects, where not only functionality but also luxurious finishes are key. It's more than just a pergola – it's a fully-fledged relaxation area.

The series is available in two variants – for those who expect an elaborate structure with louvered panels and roller blinds, enhancing privacy and wind protection, and for those who prefer a more open form of roofing.

The electrically controlled louvered roof allows for precise light management, and the integrated LED lighting lets you enjoy the space even after dark.
The aluminum structure with an Akzo Nobel coating and the drainage system ensure durability and reliability.

PREMIUM WALL

A universal wall-mounted roofing solution.

With its minimalist form, solid construction, and a roof with movable louvers, the Premium Wall pergola becomes an extension of the outdoor living space. The louvers allow precise control of light – from full shading to pleasant partial shade. In the fully closed position, the louvers form a tight surface, and combined with the gutter system, they make it possible to use the terrace and garden even in less favorable weather conditions.

ELEGANCE WALL

ELEGANCE WALL is a line of wall-mounted aluminum pergolas.

It's delicate form, hidden joints, and availability in four colors make it a perfect complement to both residential areas and leisure zones in hotels or office buildings. It is the right choice for those who expect visual lightness while maintaining high functionality and durability.

ACCESSORIES

User-oriented design is the foundation of our philosophy. That is why we do not stop at basic functionality. Our mission is to create intelligent solutions that truly enhance the comfort of outdoor living – combining technology with nature in a thoughtful and aesthetic way.

To enrich both visual and functional experiences, we have developed a wide range of accessories: louver panels, decorative panels, LED kits, and side enclosure modules. We also offer multifunctional pergola systems that can be integrated with carports – creating cohesive, modern environments for everyday living.

ROLLER BLIND

A practical solution for pergola side enclosure that effectively protects against sun and wind while increasing the privacy of the relaxation area. The blind is mounted at the top of the structure, and its operation is intuitive – simply pull to stop it at any desired height. The guide rail system ensures smooth movement and stability, even in stronger winds.

HORIZONTAL SIDE PANEL

A sturdy aluminum construction guarantees corrosion resistance and easy maintenance – ideal for outdoor applications. Panels can be mounted individually (e.g., at corners) or connected modularly, creating complete side enclosures for the pergola. This flexible solution allows users to adapt the space to their needs.

HORIZONTAL SIDE PANEL

An aluminum panel resistant to corrosion and easy to maintain. It can be mounted individually – for example, in the corner of a pergola – to subtly accentuate the space and create a more intimate relaxation zone. It can also be installed modularly (e.g., three panels side by side), forming an aesthetic and functional enclosure of the entire side wall. This solution not only protects against wind and sun but also enhances the visual appeal of the structure.

*It is possible to purchase the side panel in an adjustable version for all colors.

VERTICAL SIDE PANEL

A vertical panel made of corrosion-resistant aluminum – durable and easy to maintain, just like the entire pergola. It can be mounted individually (e.g., in a corner) or in a modular way – with several panels side by side, forming a complete and functional side enclosure.

LED LIGHTING

An LED strip with 120 diodes per meter provides optimal lighting for the pergola. Low voltage (24V) and 12W/m power ensure safe use without the risk of overheating. The option to choose the light color (warm white or RGB) allows you to adjust the atmosphere to the occasion.

To operate the LED lighting, a control module is required, which must be purchased separately – it is not included in the set.

PANEL WALL

Take full control of the light, privacy, and comfort on your patio. The adjustable panel wall with movable louvers allows you to smoothly adjust the level of shade, creating a space tailored to your needs. The powder-coated aluminum structure in Anthracite ensures durability and weather resistance, and when closed, the louvers create a cohesive, elegant surface. This solution combines functionality with a refined, modern design.

ROLLER BLIND

Add an extra layer of comfort and protection to your outdoor space.
A roller blind is a practical addition to a pergola that effectively reduces sunlight and shields you from the wind, while still allowing air to circulate freely.
The high-quality Textilene fabric provides optimal shade while maintaining air circulation.

SIDE CURTAIN WITH MOSQUITO NET

Create a comfortable, sheltered space no matter the time of day. A side curtain with a mosquito net is a practical addition to your pergola, protecting against insects, providing privacy, and offering gentle shade. The fine mesh effectively keeps insects out, while the PU-coated fabric protects against the sun and moisture. The runner system and zipper ensure a tight seal and convenient, intuitive use.
